## Testimonial

January 25th, 2021

Airborne Consulting and Dr. Wissel have been supporting us with a strategically relevant project at the end of 2019.

Dr. Wissel has been responsible for the concept development of a cost-optimal freighter operations with all organizational details. Supported by a location study and a make-or-buy analysis, he prepared the decision-making process in our company.

A detailed analysis of crew costs, support with fleet planning as well as a SWAT analysis completed the business plan.

The collaboration with Dr. Wissel and Airborne Consulting was excellent, from our experience we can recommend their services.
